Work Experience

Software Developer - Hexagon

Dec 2021 – Present

- Worked on OCR(On Call Records) Product.
- Collaborated with a cross-functional team to enhance the Address Server user experience, resulting in improved performance.
- Utilized Front-end technologies such as HTML, CSS, JavaScript, React to implement responsive and intuitive user interfaces.
- Conducted thorough testing and debugging to identify and resolve software defects, ensuring high-quality code and a robust application.
- Implemented version control using Git, facilitating smooth code collaboration and actively participated in agile development methodologies.

Programmer Analyst Trainee - Cognizant

Dec 2020 – Nov 2021

- Successfully underwent training and seamlessly transitioned into the project.
- I have designed a scenario that involves transferring data from one file to another. This was accomplished by creating specific data types, message types, service interfaces, and mappings.

Projects

Portfolio | ReactJs, Javascript, Bootstrap, Css

[GitHub](#) / [Live](#)

- A responsive Portfolio Website for developers. Used React open source libraries to build the website.
